HPB Endoscopy Beyond Limits

Elevate Patient Outcomes with our Advanced Solutions

Each HPB case is different, and procedures can be complex. You need to know you have the right support to give the best care possible.

Olympus are pushing the boundaries of HPB care with state-of-the-art image enhancement technologies from the EU-ME3 and the Aplio i800 EUS for precise diagnosis. And for treatment, our TJF-Q190V duodenoscopes and EndoTherapy devices are designed to meet all your therapeutic needs.

In addition, we offer world-class training courses led by medical experts, with support from our dedicated professional education team, along with in-person guidance from clinical application specialists and INFOCUS service partners to ensure your devices are maintained at every step.

Because with your expertise, and our all-in-one HPB solution, you can push your care beyond its current limits.
